

"Correct bearing clearances and well chosen lubricants are essential to maximise lifetime and ensure a smooth operation of your rotating equipment"

Mechanical Fitting & Rebuilds

www.weservices.com.au

WES Mechanical Fitting & Rebuild Services has its roots in engine builds for high performance cars where every little component matters. In 2011 with the launch of Wittenbaker Engineering Services, our mechanical fitting services were only available for large industrial machinery on site. Three years later with the acquisition of our manufacturing workshop, we strategically positioned ourselves to provide turn key products and became a „One-Stop-Shop“. WES's attention to detail and know-how in mechanical assemblies substantially improved the life of many current machines. Our assembly services also includes electrical installation, custom control units and all of the required documentation.

Capability:

- ◆ Lifting capacity up to 32t
- ◆ Mechanical assemblies
- ◆ Hydraulic & Pneumatic assemblies
- ◆ Design & programming of control units
- ◆ Rebuild and maintenance of all fixed and mobile plant equipment
- ◆ Hydraulic component repair and service including valve banks, hydraulic cylinders, pumps and motors

We complete the assembly of your assemblies for you cost-effectively and in proven WES quality. In terms of equipment, specification and delivery dates, we meet your requirements quickly, reliably and cost-effectively.

Correct bearing clearances and bearing pre loads are essential on any bearing assembly to achieve the expected lifetime or even beyond. Selecting the right lubricants and maintaining essential service intervals will keep your critical equipment operating for a longer period of time.

As a quality supplier, we offer you the complete process: from procurement to the manufacture of individual components to the assembly of mechanical and electromechanical assemblies. Use our flexibility, experience and cost efficiency to achieve a greater economic return on your current mechanical assemblies. We also offer our industrial customers top services in terms of storage and logistics. Simply place your order with us and we will deliver your assembly with pinpoint accuracy.
