

CNC Wire Cutting EDM

www.weservices.com.au

Capability:

- ◆ Maximum part size 1300 x 1040 x 500
- ◆ Maximum part weight 5000 KG
- ◆ 0.005mm Accuracy
- ◆ Intergration with CAD/CAM
- ◆ 0.1 Ra surface finish achievable
- ◆ Ability to cut most materials that are conductive
- ◆ 5 Axis

WES-CNC Machining was founded in 2014 and has been continuously developed since day one. One of the additions in 2024 is an extremely accurate CNC Wire Cutting EDM. This machine has a large bed which gives us the flexibility for large parts or multiple smaller parts on the bed at one time. We can program simple toolpaths direct on the control or import CAD files into the machine control for more complex shapes. The ONA AV60 has a digital generator which can save upto 30% in cutting time and give the most cost effective solution to our clients.
